## Introduction

The SA Platform uses Web and security technologies, giving users ubiquitous remote access to corporate resources using a Web browser. This document describes the platforms (operating system/browser combinations) that have been qualified for use with the SA.

## SA Hardware Requirements

Service Package Version 7.4R1 is supported on the following SA platforms:

- Junos Pulse Secure Access Service 700
- Junos Pulse Secure Access Service 4000-FIPS/6000-FIPS
- Junos Pulse Secure Access Service 2500/4500/6500
- Junos Pulse Secure Access Service 4500-FIPS/6500-FIPS
- Junos Pulse Secure Access Service 2600
- Junos Pulse Secure Access Service 4610
- Junos Pulse Secure Access Service 6610(with SM 160 and SM 360)
- Junos Pulse Secure Access Service 6611(with SM 160 and SM 360)

## Platform Support

Juniper Networks tests the mentioned functionalities of the SA Platform on most widely used corporate and consumer platforms to qualify each platform as either qualified or compatible.

The platforms in this list are divided into two categories: compatible and qualified. The complete list of platforms/browsers in the document is supported. If problems are encountered on either a qualified or a compatible platform then Juniper support will attempt to resolve the issue.

**Windows XP:** Refers to Windows XP Professional/Home Edition

**Windows Vista or Vista** refers to Windows Vista Enterprise/Ultimate/Business/Home Basic/Home Premium

**Windows 7:** Refers to Windows 7 Enterprise/Ultimate/Professional/Home Basic/Home Premium

**Windows 8:** Refers to Windows 8 normal-edition/Pro/Enterprise

All of the information is valid on the date when the document was published. This applies to the comment for 'and above' versions stated in this document as well.

For all newer versions of browsers and operating systems please contact Juniper Support.

### **Qualified Platform**

The platforms listed in the “qualified” category have been systematically tested by QA department as part of the release covered by the Supported Platforms document.

### **Compatible Platform**

The platforms listed in the “compatible” category have not been systematically tested by our QA department in this release but based on testing in previous releases and knowledge of the platform Juniper expects that the functionality will work and will fully support these platforms.

### **Multiple Language Support**

All the end-user functionality has been localized in German, French, Japanese, Traditional Chinese, Simplified Chinese, Spanish, and Korean. The administrator user interface is supported in English only.

## **Cross Platform support**

### **Web and File Browsing**

#### **Administrator User Interface (Web Console) <sup>1</sup>**

#### **Secure Client-side Java Applets**

#### **Secure Terminal Access**

#### **Java-Secure Application Manager (J-SAM)** [Not applicable for SA 700]

#### **Network Connect**

#### **Pulse Collaboration** [Not applicable for SA 700] \*\*\*\*

Pulse Collaboration is not supported on Mac PPC. It is supported only on Intel based Mac machines.

#### **Host Checker and Cache Cleaner** [Excluding EES, refer next section for EES]

**Cache Cleaner** is not supported on Mac and Linux platforms

### **Qualified platforms:**

## Adaptive Delivery for Juniper client applications

In cases where ActiveX is disabled or is not available due to platform or privilege limitations, the client application is installed using Java. Adaptive delivery is available for Host Checker, Enhanced Endpoint Security, Windows Secure Application Manager, Network Connect, Windows Terminal Services, and Secure Meeting clients.

Installing Sun JRE 6 or greater might improve the user experience for adaptive delivery for Juniper client applications.

### Juniper Installer Service

Juniper Installer Service is supported for the following client applications: Network Connect, Windows Secure Application Manager (W-SAM), Host Checker (including CacheCleaner), Pulse Collaboration and Terminal Services.
